

ThinkShield

FOR MOBILE

**Business-grade security, manageability,
productivity and service.**

Smarter security for all

Security | Manageability | Productivity | Service

WHAT IS THINKSHIELD FOR MOBILE?

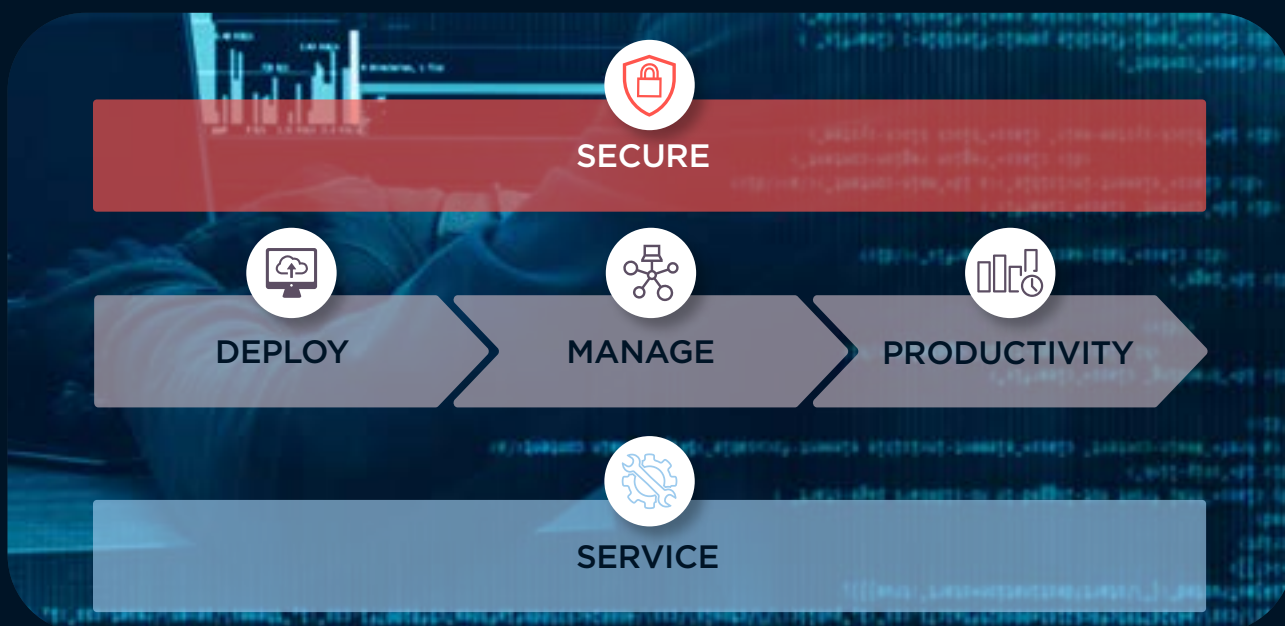

Security is always our first consideration and is a fundamental part of Motorola - it is at the core of what we do; from designing a device through to the end user and everything in between. ThinkShield for mobile is an extension of Lenovo's ThinkShield portfolio, designed to deliver best-in-class business-grade security, manageability, productivity and service features for our smartphones.

ARE YOU READY FOR TOMORROW'S THREATS?

There has been a rise in threats made to smartphones in form of malware, phishing, network attacks and more. As these threats continue to change, adapt and get more sophisticated - the greater the need for a robust solution. To combat these threats, we developed ThinkShield for mobile, which is built on four fundamental principles; Clean OS, Secure by Design, Always-on Manageability, End-to-end approach.

ThinkShield for mobile will be available on select Motorola devices.

SMARTER SECURITY FOR YOUR BUSINESS

PLATFORM SECURITY AND ADVANCED PROTECTION

Our devices have security integrated at every level and at every stage of the product lifecycle. We take a 360° approach to security: spanning across our trusted supplier program, government grade certifications (such as FIPS), and manufacturing processes with secure factory provisioning, as well as AI-based defense solutions and a dedicated incident response team.

DEPLOY

All our devices support zero-touch enrollment for a seamless deployment of your devices. We are continuously adding and developing additional provisioning capabilities to meet your specific device configuration requirements.

MANAGE

We are committed to always-on management to help you easily control the devices in your environment. We have certifications and strong partnerships with device management providers to ensure close alignment with leading industry solutions, and to support cutting-edge management capabilities.

PRODUCTIVITY

We deliver simple, effective and secure productivity features across smartphones, tablets and laptops. Including communication, location tracking for task management and secure multi-screen capability.

SERVICE

We understand your requirements and will help you manage the lifecycle of your smartphone portfolio. Our services include dedicated business support, deployment and zero-touch enrollment services, as well as, extended warranty, accidental damage protection and expedited device replacement.
